* **Cerberus Content Management System - Named From The Hound of Hades**

// Advanced Content Management System, Written In Pure Post-Hyper-Text-Pre-Processor Scripting Language, With AJAX and JavaScript Editions For Drag-and-Drop Interactivity

~ 35,000 Lines of Pure and Thoroughly Documented Post-Hyper-Text-Pre-Processor Programming Code

Unix Name Officially Registered Digitally On F.M. In California, ~ 2002

* **Magysk Theme Writer - Named From The Frisian Word For Magic**

// Graphical-User-Interface Application For Building Themes For Use With Cerberus Content Management System / Runic Content Management System, Written In The C++ Programming Language

~ 15,000 Lines of Pure and Thoroughly Documented C++ Programming Code

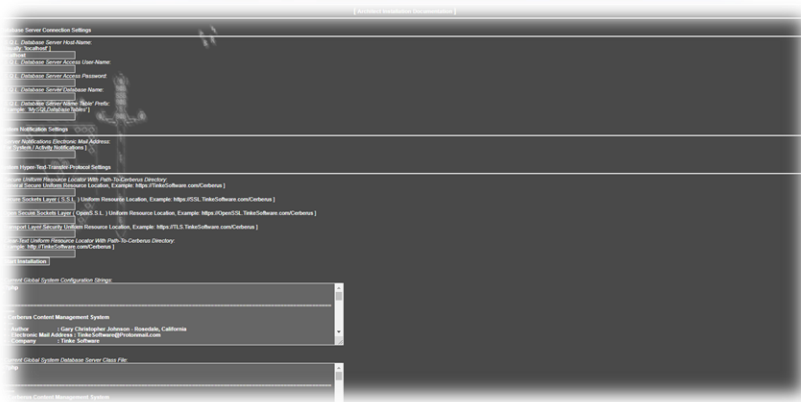

Unix Name Officially Registered Digitally On S.F. In California, ~ 2012

* **Stokje Application Writer - Named From The Frisian Word For Wand**

// Graphical-User-Interface Application For Building Web Application Module Includes For Use With Cerberus Content Management System / Runic Content Management System, Written In The C++ Programming Language

~ 18,000 Lines of Pure and Thoroughly Documented C++ Programming Code

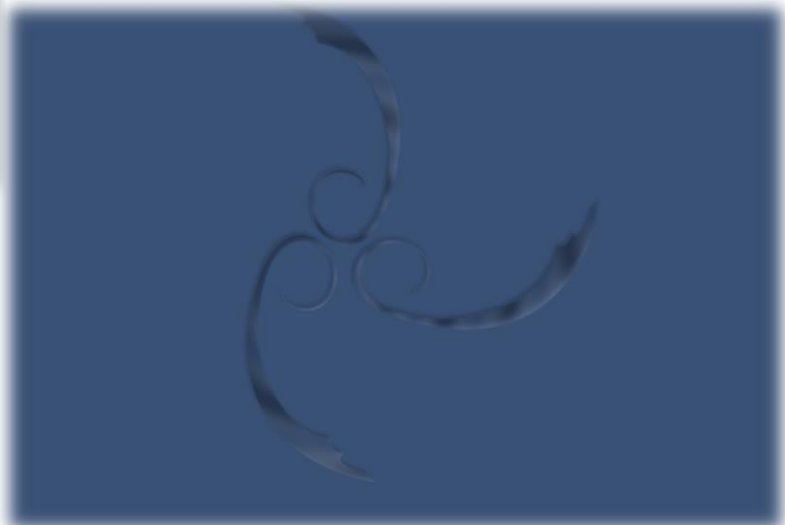

Unix Name Officially Registered Digitally On S.F. In California, ~ 2012

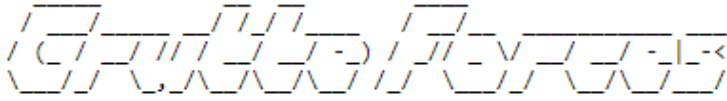

```
Cerberus Content Management System
- Author : Gary Christopher Johnson - Rosedale, California
- Electronic Mail Address : tinksoftware@protonmail.com
- Company : Tink Software
- Company Address : Rosedale, California, U.S.A.
- Document Notes : View this file in a non-formatting text editor without word-wrap for the correct
display of this programming code and its indentation.

- File Location: root->Cerberus->Cerberus.php
- File Version : 0.6 - Wednesday, March 1st of 2023

-----
Cerberus Content Management System :: Kernel
-----
This Kernel File Has Complete Control of Everything System-Wide
Refer to the programming documentation videos and portable-documents
