Simonides of Ceos, Greece

Legend has it that Simonides himself was approached by Zeus and another unnamed Deity of Female Greek cultural origins to be given the Methods of Loci and Total Recall. Early documents show that when Simonides taught some of this to the local politicians and officials who demanded to know how he amassed a perfect memory of everything in the city and all of the people's names and faces they were thereafter destroyed by Zeus for their corruption while seated within a banquet hall seated also by Simonides who was spared.

The banquet hall was destroyed by a sudden earthquake where parts of the building came crashing down crushing and killing all of the people who were sitting around the tables. Simonides was later called upon by the local authorities to identify the bodies of the people who died at the tables. The local authorities were amazed to see that Simonides identified them all based on where they were seated around the tables. Simonides began his travels through Greece teaching to academics what he learned from Zeus himself. Rumor spread around parts of Greece and Rome that there was a man gifted by the Gods who could memorize anything including entire books word for word, histories, everyone's name and face in a city, a man who mastered Mathematics, Poetry and several other academic subjects.

Some of the writings were written down on parchment and papyrus and they passed down through the ages until they found their way into the hands of Eastern Orthodox and Roman Catholic Monks and Knights who brought back the knowledge to Europe in the Crusades. The methods were taught and shown to Kings, Dukes and nobles of Europe. Some of the memory systems survived into scarcity in Europe after the Renaissance. The Methods of Loci were originally one part of a supreme work on memory. In academia word has it that even Roger Bacon himself was a master.

Who is usually taught in present-day ?

European Royalty, Top Academics, Chairmen and Executive Officers of Multinational Corporations, Others.

Who will I teach ?

Anyone with a love for academics.

Roger Bacon
